REPORT OF SCHOOL BOARD.

Another school year has been completed, and it remains for the School Board to report the quality of the work accomplished. The teachers have all appeared interested in their duties, and have labored with commendable zeal and faithfulness to instruct the pupils under their charge, and we find on summing up the work accomplished during the past year, that a good degree of improvement has been the result. The attendance at school has been very good in most cases. Of course there has been a few exceptions, as it always is bound to be so, no matter how hard we try to have it otherwise. We believe that a great responsibility rests upon the parents. If they allow their children to go at will during school hours, perhaps attending one day and staying out two or three, and so on year after year, they ought not to complain if their boys and girls do not keep up with their neighbors' children who attend school every day. We sometimes hear it said "my children do not learn as I would like to have them"; and on sifting the matter down, we find it is usually those children who do not attend regularly and those whom we often see on the street during school hours, while many others will be found in their places within the school room, with book in hand, working hard to solve those difficult problems which will be useful to them in after years in their intercourse through the world at large, and they are the ones that will succeed. And now the advice we wish to give the fathers and mothers: Keep your children at school as long as you can; you may not be able to give them anything but an education, but remember it will be far better than riches without it. In fact, a young man or a young woman is indeed rich who has attained a liberal education; for in these busy times there is many calls for all such in places of trust and responsibility, and we want to see the young people from this town placed in the front rank in the grand rush of progress; and there is no reason why they cannot be found there, for there are many bright boys and girls in this town, and with as good school privileges as any town of its size can boast of, with all necessary material furnished, if the young do not reach the high elevation in which it is their privilege, it seems to us as though the parents and not the children are alone to blame. We were very much gratified in witnessing the closing examination of the several schools, to see the advancement which had been made.

Now, in closing, we will say to the young, press on, fit yourselves for the duties of life, for you will soon be called on to take the place of fathers and mothers in conducting the affairs which will devolve upon you.

REPORT OF SCHOOL BOARD.

Another financial school year has closed, and it becomes the duty of the school board to report to the citizens of Greenfield what progress has been made and how the money placed in our hands has been expended in planning the schools and procuring teachers, and all other duties pertaining to the school system. It requires labor and patience, and all must work together—school board, parents and scholars; this must be done in order to secure the greatest results for the children of today, who are marching on and on as the years go by, and it will not be long before they will be beyond the limit in which they are required to attend school. Then, if they have not lost the golden opportunity of procuring a liberal education, as is the privilege of all in these times, when we have ample schools and abundant supplies of all kinds furnished free of cost to the pupils, there can be no excuse along that line if the children do not attain to the standard in which it is their privilege to reach.

The schools in the last year have been practically a success. We visited each school several times and were present at the closing examination, and can truthfully say that we believe the teachers, as a rule, have labored hard to instruct those under their charge in a way that will be useful to them in the duties of life. Your committee was very fortunate in securing the services of excellent teachers for the village schools, Misses Tobie and Pettee of Francestown, who have had large experience in teaching and have always given good satisfaction. At the examination of the Grammar school, taught by Miss Minnie Tobie, we were particularly gratified in noting the marked improvement made in the handwriting of the pupils, also a good degree of improvement in other branches of study. The Primary school, taught by Miss Mary A. Pettee, also met the approbation of the school committee at the closing exercises of the winter term. Miss Maud Muzzey taught both terms in the west district to the entire satisfaction of all. In the south district Miss Alice B. Sawyer of Antrim taught both summer and fall terms, and in the east district Miss Ina Hildreth of Antrim taught the summer and Miss Ethel Burtt of Bennington the fall term. These teachers had all had more or less experience in teaching and came to us well recommended and prepared to enter upon the duties which would devolve upon them as teachers, and all gave general satisfaction.

We find, on summing up, that improvement has been made all along the line. It is very gratifying to the school board and to the teachers to have the parents visit the schools as often as possible, that they may see for themselves how much the pupils are advancing and how the money is being expended. We find that during the last school year the visitors in all our schools have been two hundred and twenty-six—a very good showing—but we hope in the coming year it will be even greater than that. Now, in closing, we beg leave to present the financial report and roll of honor.

REPORT OF SCHOOL BOARD.

As Chairman of the Board of Education the following report is submitted :

The enactment of the statutory provision that the School Board shall annually report upon the state of the schools under their charge, was for the purpose of informing the public in what manner, and what, from time to time, might be the particulars of its management of their most important institution.

A tribute to the teachers of our schools in Greenfield of their worth the past year, is too conspicuous and well known to be emphasized here. An invaluable quality of a successful teacher is, in treating every child with kindness and respect ; faithfully subduing the most remote appearance of favoritism ; dealing justly and uprightly with the poorest ; treating all as though they were equal, and setting an example of rectitude and politeness before all, and as far as we have been able to learn our teachers have been models in this respect.

The relation of the parent to the public school, is worthy of careful thought. Parents may exemplify their interest, by always refering to the school system and to individual teachers in the hearing of their children with respect and dignity for both.

The board of health ordered the Village schools, and one in the eastern district closed two weeks before the spring term should have closed, fearing an epidemic of measles, as several cases had appeared among the pupils.

The examinations of the different schools during the year were highly satisfactory to our school board. The exercises on the blackboard of the Grammer department excited much interest among the many visitors present. While commendable progress has been made in the different studies pursued, writing has been carefully attended to in the schools generally, and as a whole, it is excellent. Twenty-five dollars was expended for an organ which was placed in the Grammar department. Singing was a satisfactory feature of the examination. It was noticed that the children from the Primary school surpassed those of the higher grade in fullness, and sweetness of tone. Both teachers of the Village schools deserve much praise in advancing the musical knowledge of their pupils. Drawing as taught in our schools is not a mere accomplishment, nor is it an amusement. In a word, all manufacturers depend on drawing. The designer conceives in his mind plans for buildings and machinery which must have sections, and drawings of parts. Drawing it has been said "Is the language of all the industrial arts."

It is to be regretted that there is so much hesitancy on the part of the well-to-do farmers in the eastern district to furnish board to teachers at what would be considered a remunerative price. We

hope that in the future it will be unnecessary for teachers to seek for board in the village and to be transported to and from the school house daily.

At the annual meeting of the school district of 1901, it was voted to raise and appropriate fifty dollars to improve the play ground at the school house near Russell's Station. The money is now in the hands of the treasurer of the school board to be expended at an early day for the purpose of which it was designed.

GEORGE S. PEAVEY,
FRANK H. WHEELER,
MASON L. WHITE,
} School Board of Greenfield.

REPORT OF SCHOOL BOARD.

As time passes along it has brought another financial year of town affairs to its close. And it is expected at this season that the School Board shall render an account of their stewardship; therefore, we submit the following for your consideration. Now, we do not claim perfection. Neither do we believe it is possible to be absolutely perfect in any branch of service. Nevertheless, as your agents and servants we have endeavored to perform the duties of the office as we were shown to the best of our

ability, for we feel a deep interest in the education of the children of today, realizing that their school days will soon be over, and when they must take the places in the world which is now held by those who are older, and then with a substantial book knowledge, which it is their privilege to attain, they will be prepared to grapple with the difficult problems of life. It is our desire at all times to place as competent teachers in our schools as possible, and use the money you place in our hands in the most judicial way possible. There is one thing we wish to impress upon the minds of the pupils and parents alike, and that is the constant attendance of your children at school. Those who go one day and stay out two cannot expect to make the advancement as those who are always there during school hours. Now during the year which is to come let us all strive to do the very best we can to make it a profitable school year for all. We give herewith the report of the treasurer of the School Board; also roll of perfect attendance.

FRANK H. WHEELER,
MASON L. WHITE,
GEORGE S. PEAVEY,
School Board of Greenfield.

REPORT OF SCHOOL BOARD.

The School Board respectfully submits the following annual report:

The past year has evidently been much like its predecessors. There has been no marked improvement in the condition of the schools and no deterioration. A town like this, with outlying districts with no facilities for the conveyance of the pupils to a common central school, can hardly hope for the best results. And yet far better results could readily be secured by the co-operation of the parents with the teachers. No matter how well prepared and efficient a teacher may be it is impossible for her to do good work in the conditions which have obtained in our schools. "A fleet is no faster than its slowest vessel," for the simple reason that its vessels must keep together, and in the class in school a half dozen bright and faithful pupils must wait, when prepared to advance, because one of their number has been detained to do chores or to run an errand. These delinquents dishearten the best teacher and retard the progress of the willing and the faithful. Perhaps there is no remedy for the evil for the parents of the delinquent pupils are those who do not read the report of the School Board, and if they did they would soon forget the appeal.

Change of teachers has occurred in each of the schools except the Center Primary. The people are fortunate that the services of Miss Pettee have been so long retained as the teacher of their children. There are other teachers whose term of service has been brief who have done efficient work.

It should be borne in mind that a teacher's value is not to be estimated by reports of some of the pupils, and it is no less true that there may be conditions which render it impossible, in a single term, to test a teacher's efficiency.

All the education which a large majority of our children get is from the schools of this town, and they surely need it all. "I do not see how that study will help a boy get a living" is a remark which has been made by some who mistake the aim of a school and of life. "Man shall not live by bread alone," and that which helps a boy to a better manhood makes life the more worth living.

REPORT OF SCHOOL BOARD.

In making our annual report, agreeably to the requirement by law, we are pleased to present such favorable conditions and so fair an outlook. There have been hinderances, such as was the case in the Village Schools on account of the prevailing epidemic (measles) during our Winter Term. We felt obliged to close the East and West Schools earlier than we otherwise should have done, on account of sickness and bad traveling. Yet in spite of these, we report they have been very satisfactory to all interested. This of course, is mainly due to the teachers we have had in our service. We hope that a larger part of them will be retained, and in order to place our schools on a firm basis with other schools, the parents must co-operate with the teachers, and we confidently expect they will cheerfully endorse and support any forward step, if such step is judiciously taken.

In regard to our school houses, we are able to report they have all been recently treated to a coat of paint and are in good condition except the West School house, which in our judgment should be reshingled during the present year. It seems to us nothing gives a town a better name than good schools, well preserved school houses, and a neat and well attended church.

REPORT OF SCHOOL BOARD.

In our annual school report we desire to impress on the minds of both parents and scholars the fact that the school board is only an auxiliary to the success of our schools, and that you are equally responsible for the success or failure of educational work. Credit is due the teachers for their faithful work, for we realize the fact that in our public schools the many duties devolving on the teachers are often very arduous. Our aim is to retain satisfactory teachers for we believe this is the only successful method in educational progress.

Necessary repairs have been made on all school buildings to insure their preservation. Earnest effort on the part of all will insure success in our schools and make the duties of the school board a pleasant responsibility.

REPORT OF SCHOOL BOARD.

In our annual report we desire to say to the citizens of Greenfield, that we have endeavored to do our duty in the matter of schools and render to all of the pupils a good degree of instruction, to that end we have labored according to our best ability. In regard to teachers we have striven to select those who were fully competent to do the work which was assigned them, and as a rule your committee have been very fortunate in securing those who have been faithful to their trust, and under their guidance, the schools have made marked improvements. As a rule the schools have been well attended, although sickness and other unavoidable circumstances have debarred some of the pupils from attending all of the time, then again there are others who could and ought to have attended much more than they have, in after years when it is to late, they will look back and say, how I missed it that I did not improve the opportunity which was my privilege. Now in the coming year let all of the scholars form this resolution, "I will attend school every day and do all that I can to make life a success." Now we would not have you think for a moment that all the blame rests with the truant pupil for it is not so, it rests in a great measure with the parents, who should commence with their children as soon as they are of school age, and make them to understand that the schools are for them and that they must attend. With those rules laid down and strictly adhered to, we think in a short time there would be no pupil playing truant. Now in the coming school year let all do the best they can and strive to make it the banner school year for Greenfield.

Quite a sum of money has been expended during the past year in needed repairs on our school buildings. The one in the village and the one at the south part of the town have been newly shingled, about 30 M. of the best quality of cedar shingles were used upon the village school house, and now the building is in the best of repair throughout.

A large number of our citizens have availed themselves of the opportunity to visit the schools during the past year, and we are pleased to note the fact for that is as it should be. Go into the schools and see your children work, watch them and give them all the encouragement possible, we have many bright scholars and with proper training and a liberal education they are bound to make their mark in the world. It is the children of today who must take the cares and responsibilities of business upon their shoulders to-morrow, now in view of this fact

it is expedient that we all work together to make our schools a success, and to fit the children for the duties that will devolve upon them.

Elijah H. Clover,
Mrs. Jennie M. Hopkins,
